Let's Be Careful to Prevent Fires

火災が起こらないように気をつけましょう

■ Be Sure to Install Residential Fire Alarms

Fire alarms must be installed in bedrooms. They may also be required in stairways.

All homes must have fire alarms installed. Although fire alarms are not required in kitchens, installing one is recommended.

■ In Order to Prevent Residential Fires

Prevent fires through everyday habits and safety measures at home.

- Fires caused by lithium-ion batteries used in portable power banks and other devices are occurring more frequently, so be sure to handle them with care.
- Do not place flammable objects near heaters.
- Use fire-resistant bedding and curtains.

■ Be Careful of Fires Caused by Cigarettes

Fires caused by cigarettes can be difficult to notice. They may develop into major fires while you are away from home or sleeping. Clean ashtrays frequently, and soak cigarette butts in water before throwing them away.

■Take Steps to Prevent Arson

- Lock sheds and garages, install outdoor lights, and keep the area around your home well lit.
- Do not leave cardboard boxes or other flammable materials around your home.
- Do not leave personal belongings in shared areas of apartment buildings or other shared housing.
- Put out your garbage on the morning of the scheduled collection day.
